

Luca Lischetti

a.k.a. sirLisko

Senior Software Engineer

Skills

Main

- Javascript
- React
- Node.JS
- Markup/CSS
- Front End Architecture
- FE Build & CI
- BDD/TDD
- Functional Testing

Misc.

- Agile / Scrum
- Redux
- Webpack
- Gatsby
- Gulp / Grunt
- Chrome Extensions
- Bash Scripting
- User Scripting
- Web Scraping

Experiences

Reason

09.18 - 12.18

Developed from scratch the whole Front End and some basic services for 3rd party client Coverly.

The stack included React/Redux, Jest for unit testing, Storybook for documentation and Node for the API integration.

Deployed the services to AWS and Azure using Bitbucket pipelines.

Dealt with the client and the 3rd party API provider. Iterated on the product and the designs to facilitate the development.

Verve

05.17 - 07.18

Worked on improving the user experience through the check-out with technologies involving React/Redux, Relay and GraphQL.

Improved the Front End unit testing environment, migrated to Jest and introduced snapshot testing.

Integrated 3rd party payment methods (Stripe).

Worked with the design team to improve the UI/UX.

Pobble Education

06.16 - 05.17

Rewrote the whole Front End architecture following the Angular.js best practices. Decoupled the Front End from Rails.

Introduced a Front End build system. Defined a code style guide. Introduced unit/functional test frameworks.

Shazam Entertainment

10.11 - 05.16

Developed the main website (shazam.com).

Co-operated in the realisation of a modular architecture of the Front End (AMD, BEM) and its build system (Node.js and Gulp).

Developed a custom solution for functional tests.

Worked on automation tools and localisations.

YOOX Net-A-Porter Group

09.10 - 10.11

Mainly involved in JavaScript stuff, especially Test Driven Development (TDD), unit and functional testing, continuous integration and build automation.

Projected and developed a targeted JS framework.

Once Upon A Time...

I had the pleasure to work also with Java, Scala, PHP, MySQL, C++, Ruby on Rails. I don't consider myself an expert on those languages but I like, especially in my free time, playing with other technologies :)

Side Projects

ZoomME.ME

Super simple zoom-in meme generator. Drag and drop an image and then create your meme.

PWA (Progressive Web App) powered by pure and sweet Vanilla Javascript.

Should I Listen It?

Little webapp that shows you the most played songs by an artist in the last two years of gigs.

Node.js app that proxies external APIs (Setlist.fm, Spotify and Songkick) and mashes them up to set you up for your next Gig.

Shazamify

Shazamify allows you to play your Shazams in Spotify, directly from the browser, by adding a small Spotify icon to every Shazam track page.

Chrome Extension powered by Spotify OAuth and Web API.

To see a full list of my side projects go to <https://sirlisko.com/projects>.

Education

Degree in Computer Science @ Università degli studi dell'Insubria & Universidad de Salamanca.

Thesis on Assistive Technology - <http://assistivetechology.it> (sorry link in Italian).

Extras

I co-held a workshop about TDD in Javascript @ Università di Cesena.

I'm a Volunteer and occasional collaborator of the Front-End Conference - [From The Front](#).

I have a Cisco CCNA certificate (Cisco Certified Network Associate).

I have a training certificate as Fire Marshal.

Interests

I like very much music, cinema, books, and, last but not least, pizza.

I like Art, especially modern and 8-bit graphic (like old-school video games), travel, languages. I'm also an active member of [CouchSurfing](#) community.
